Title: Test Scenario for Gmail Login page.

Test Scenario ID	Description	Precondition	Test Steps	Expected Result	Pass/Fail
TS001	Check if the user can access the login page	User must have a valid Gmail URL	Open browser, enter Gmail URL, and press Enter	Gmail login page should load successfully	
TS002	Verify login with valid credentials	User has a valid Gmail account	Enter valid email and password, click login	User should be logged in and redirected to inbox	
TS003	Verify login with invalid password	User has a valid Gmail email	Enter valid email and invalid password, click login	Error message should display "Wrong password"	
TS004	Check if "Forgot password" link works	-	Click on "Forgot password" link	User should be redirected to password recovery page	
TS005	Verify login with an unregistered email	-	Enter unregistered email, click login	Error message should display "Email not found"	
TS006	Ensure login page elements load correctly	-	Check if email, password fields, and buttons load	All elements should be visible and functional	
TS007	Verify if CAPTCHA appears after multiple failed logins	User fails to log in 5 times	Enter wrong credentials multiple times	CAPTCHA should be displayed for extra security
